

Portable Ozone Generator TROG-602

www.labomate.com | info@labomate.com

Description

Portable Ozone Generator TROG-602 is a lightweight and portable device. It can use for a variety of sterilization and purification treatments. It applies to both air and water, and it operates on the tube type-high voltage discharged gap principle. Designed with stainless steel and therefore can start producing O₃ at a rate of 5 g/h. It performs and has a long service life.

Features:

- It is having with good performance and long life
- It is equipped with a stainless steel chamber
- This applies to the use of air and water due to the operating principle of tube-type high voltage discharge paths
- It has a lightweight and portable device
- It can generate O₃ ranges
- It is having with an ozone concentration
- Intended with a high voltage ionization
- It is both industry and household type
- It is an automatic control time type device
- It is having with a cool wind of Byo

Specifications :

Application	Both can use air and water
O3 range	5h/g
Overall size	500 ×160× 220 mm
Packing Size	550×220×270 mm
Power	220V/ 50HZ

E. Cherry St. Springfield MO 65802, USA
